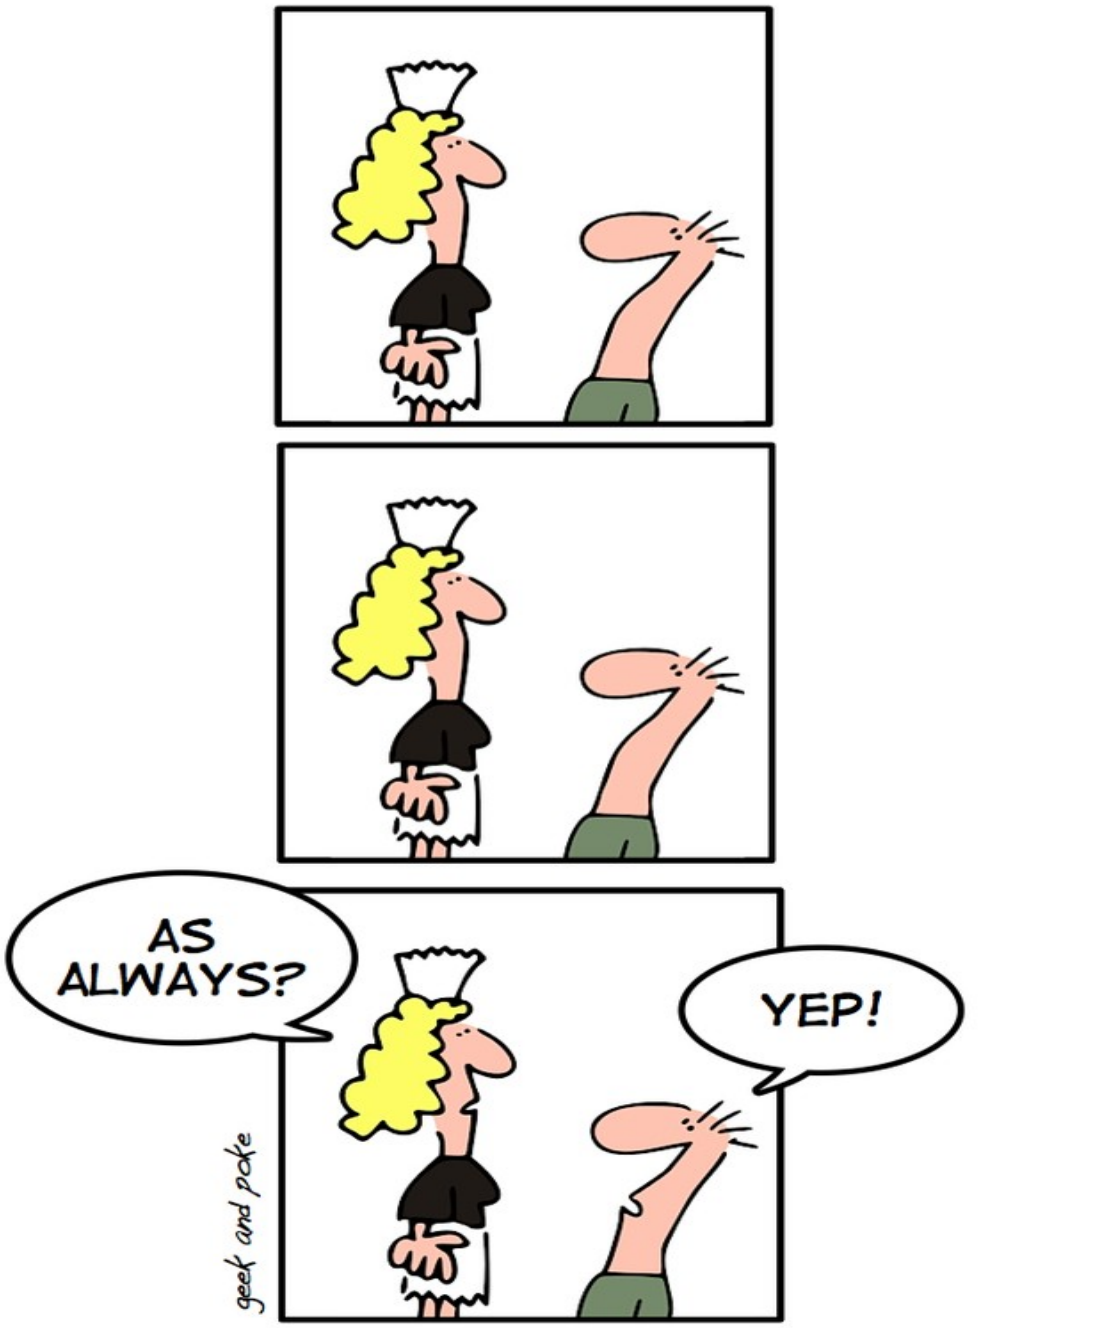
Philosophy

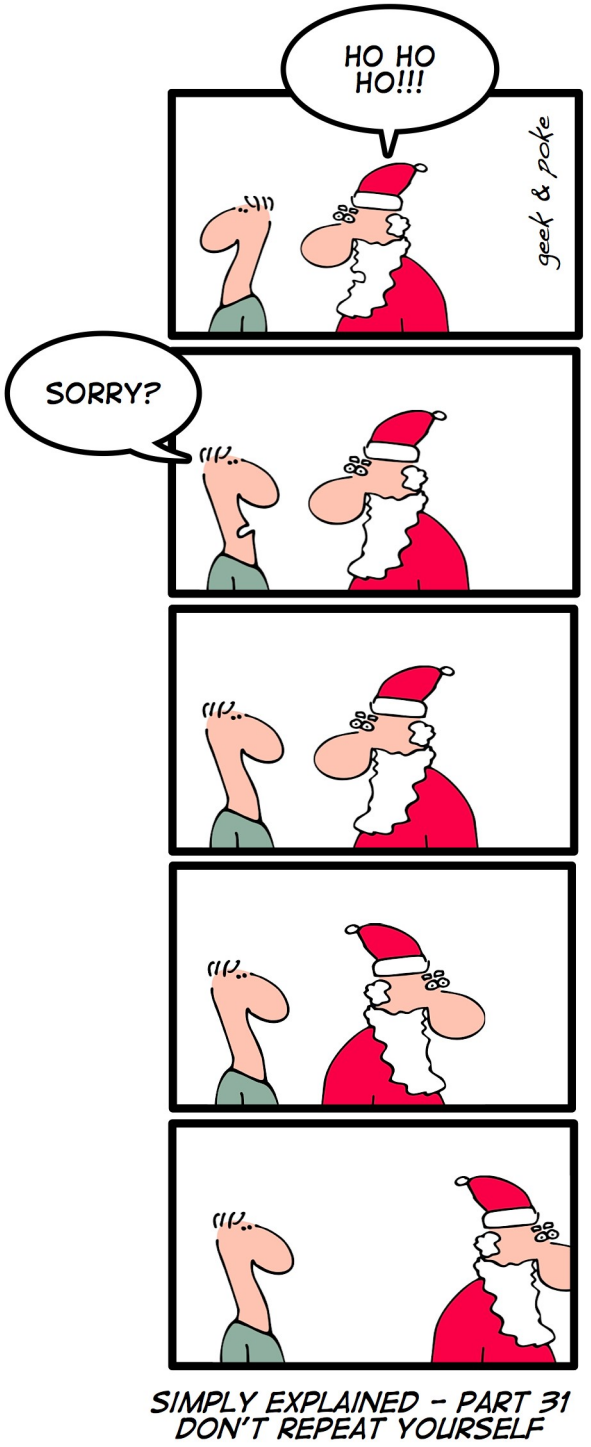
Slides until hands on: 10

use **CoC**.
Convention over Configuration



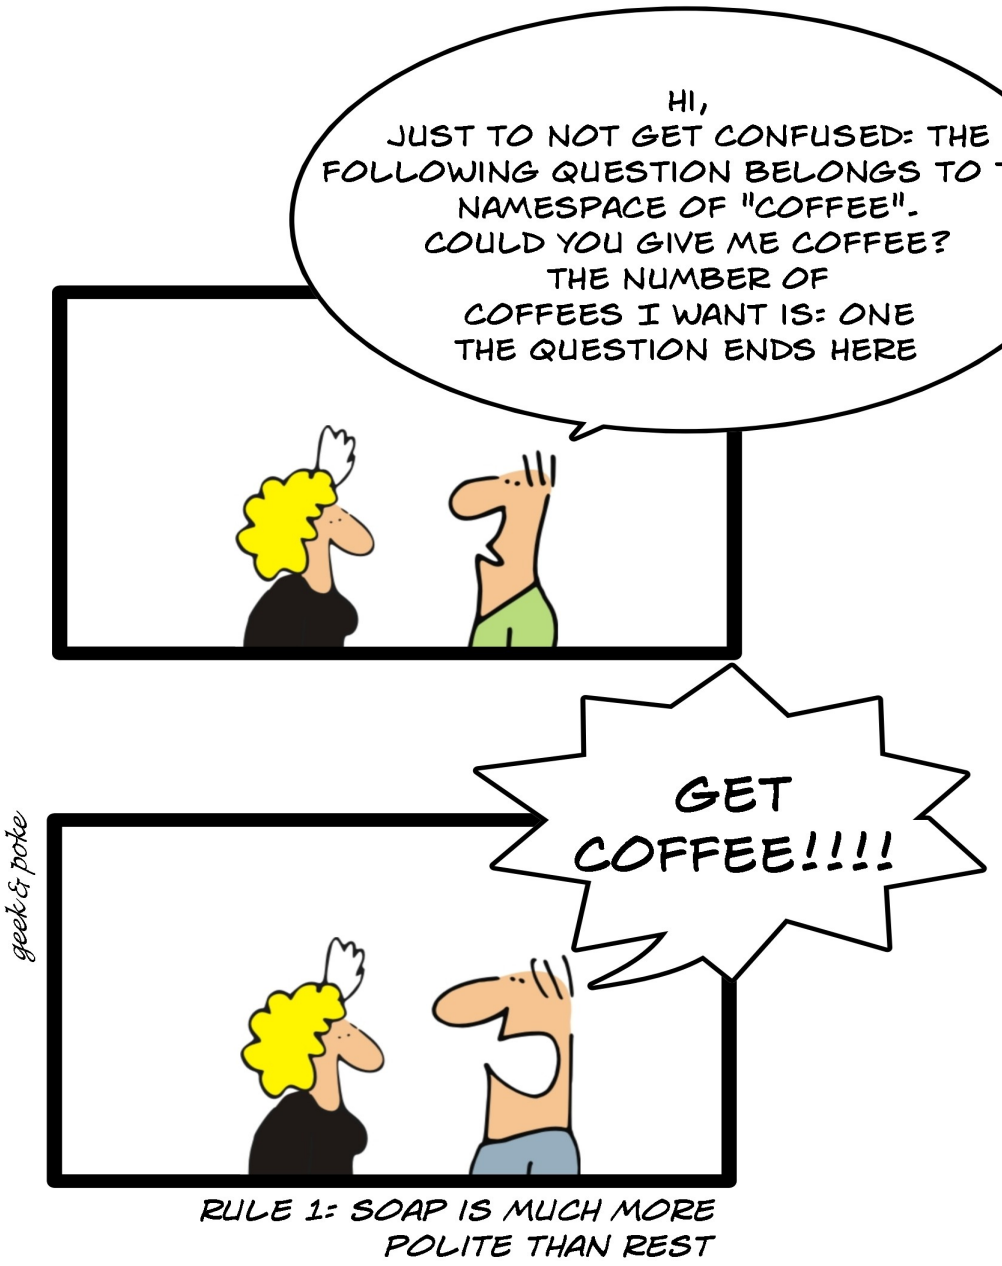
Slides until hands on: 9

be **DRY**.
Don't Repeat
Yourself



Slides until hands on: 8

with **REST**.
(bla bla bla)
organize around
resources



Slides until hands on: 7

Components

Slides until hands on: 6

Framework of frameworks. Literally

- Action Pack
  - Action Controller *
  - Action Dispatch
  - Action View *
- Action Mailer *
- Active Model
- Active Record *
- Active Resource *
- Active Support

* Railties

Slides until hands on: 5

What's new in Rails 3

Slides until hands on: 4

Random stuff I like

- Bundler
- ActiveRelation
- Modularity

Slides until hands on: 3

What's old in Rails 2

Slides until hands on: 2

Out of the box
(or very very near the box)

- Gems
- ActiveRecord (ORM and much more)
- Internationalization (I18n)
- Rack
- Heroku
- Prototype / jQuery
- ...
- What did I miss?

I'M ABOUT TO BUILD A WEB APPLICATION. COULD YOU RECOMMEND A WEB DEVELOPMENT FRAMEWORK?
OF COURSE: RUBY ON RAILS
I SEE. IT'S THE MOST PRODUCTIVE AND AGILE FRAMEWORK, ISN'T IT?
NO. BUT YOU CAN BLAME IT IN CASE YOUR APPLICATION SUCKS
geek and poke
